

AutoJet Scissor Lift

Heat Exchanger Cleaning

CALDER

Introduction

The AutoJet scissor lift is a sturdy positioning device for up to five lances. It is suitable for many tube bundle sizes with a cleaning height range of 0.6 metres to 7 metres from ground level.

There are four stabilizers to set and maintain the position of the AutoJet. The unit is powered by a Hatz silent pack and operation is by remote control to ensure the operator can maintain a safe distance during movements.
