POSITIONING YOUR FLEX LANCE FEEDER DEVICE

DERC Universal Lightweight Positioner

The DERC Universal Lightweight Positioner is designed and built for positioning your hose feeding device for semi-automatic cleaning of heat exchangers. The frame has two pneumatic powered carriages for the X- and Y-positioning. By connecting a flex lance feeder device to the frame, the inside of the tubes of the heat exchangers can be safely cleaned with high pressure water blasting.

SAFETY

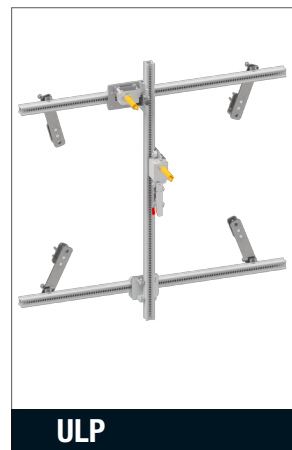

The pneumatic drives for horizontal and vertical movement are handled from a control panel, placing the operator at a safe distance. The ULP can be installed in a vertical or horizontal situation.

APPLICATIONS

+ Positioner frame for horizontal or vertical heat exchanger cleaning

The Universal Lightweight Positioner is available in different models:

- + ULP Standard for smaller diameters
- + ULP-C is a ULP with a correction shaft, which we advise for bigger diameters. The correction shaft ensures accurate positioning
- + 2.5" or 4" lightweight aluminium rail

The DERC Flange Clamp set, made of stainless steel, for easy mounting the DERC Universal Lightweight Positioner on the heat exchanger. The clamps can be bolted or clamped on to the heat exchanger flange. The aluminium rail simply hooks on to the clamp set.

DERC SALOTECH – ORIGINAL EQUIPMENT MANUFACTURER AND SUPPLIER OF INNOVATIVE HIGH PRESSURE WATER JETTING SOLUTIONS, AUTOMATED EQUIPMENT AND ACCESSORIES. WE PROVIDE STATE OF THE ART KNOWLEDGE AND SERVICES.
