

The professional water tool.

lightweight✓ compact✓ effective✓

RD MASTERJET

The new rotorjet generation with HPS sealing technology

RD MASTERJET

Number of nozzles: 2

Number of nozzles: 4

Length: 170 mm
Diameter: Ø 56 mm
Weight 1 kg*

*including 5 mm steel protective cap for wear prevention

Operating pressures

Standard version: 100 – 1800 bar
HPS version: 500 – 3200 bar

HPS

High performance seal system

High level of ergonomics

due to the light weight and compact nozzle design

Outstanding performance

with operating pressures up to 3200 bar

High energy efficiency

The optimum internal flow allows the pump's total performance to be used without loss of energy

Long life expectancy

based on the Hammelmann HPS seal system and new robust components

Versatile

Universal nozzle hub for working with 2 or 4 nozzle inserts

Variable speed

controlled by infinitely variable magnetic brake

Speed adjustable by hand

controlled by variable magnetic brake, in rev. settings (no oil or filling tool required)

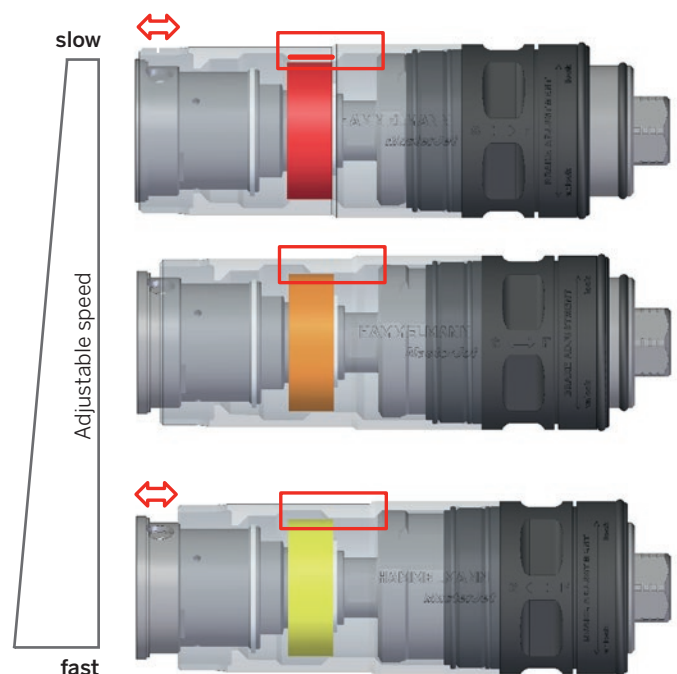

Easy maintenance

Service friendly design with few components

Steel protective cap for wear prevention

Variable speed

Brake adjustment by simple adjustment of the protective sleeve
