

MYERS® C SERIES

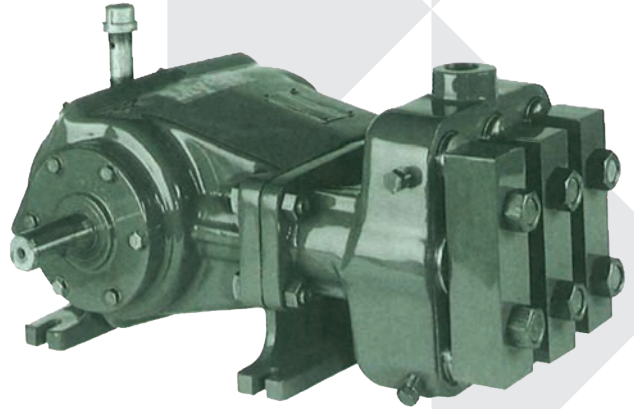

High Pressure Reciprocating Piston Pump

Over a century of experience has proven that Pentair's Myers® line of reciprocating pumps are designed and built with performance you can rely on. Our C Series high pressure reciprocating pumps combine manufacturing expertise and application understanding for a pump that is perfect for a variety of high pressure jobs.

Advantages By Design

Handles wide range of demanding industrial applications.

- High-strength fluid end and spring-loaded flat valves for high pressure pumping of large water volumes.
- Pumps liquids in mine, mill, food processing, car wash, sewer cleaner and other applications.

- Horsepower required is based upon 85% overall efficiency.
- Formula: (1) hp required = $\frac{\text{GPM} \times \text{psi}}{1457}$ or kW = $\frac{\text{LPM} \times \text{bar}}{511}$
(2) Expected GPM = $\frac{\text{Rated GPM} \times \text{Working RPM}}{\text{Rated RPM}}$
Expected LPM = $\frac{\text{Rated LPM} \times \text{Working RPM}}{\text{Rated RPM}}$
Motor sheave = $\frac{\text{Pump sheave} \times \text{Pump RPM}}{\text{O.D. size} \times \text{Motor RPM}}$

NOTE: Horsepower requirements for an internal combustion engine (gas or diesel) may be obtained by multiplying the figures listed by 1.3. Do not exceed 80% of the manufacturer's advertised horsepower at operating RPM.
