Speed Regulated Pipe Cleaner - SPC

The DERC Speed Regulated Pipe Cleaner (SPC) is the ideal rotating nozzle for cleaning horizontal and vertical pipes with multiple elbows. The compact, stainless steel design ensures that this nozzle can unplug, polish or run longer lines.

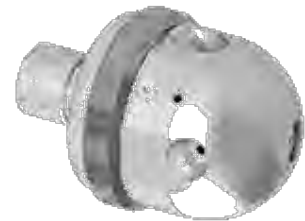

The rotation speed can be easily adjusted using a spanner to set the SPC tool for each application. The SPC is designed and constructed for water-blast cleaning of pipes as small as 2" with elbows. The SPC Centralizer makes it possible to centre the pipe cleaner to protect the rotating nozzle and achieve the best cleaning results.

Features

- For pipe sizes: 2" - 4", 4" - 6", 6" - 12"
- Pressures up to 3,000 bar
- Flow rates up to 210 lpm
- Horizontal and vertical pipes
- Low maintenance
- Short and robust design
- Long life of high pressure seals
- Various inlet connection options
- Heavy duty stainless steel construction
